Summary	Expert in architecting high-performance web applications and mastering modern tech stacks. Passionate about clean code, system scalability, and developer experience. Whether optimizing database queries or crafting responsive UIs, I take full ownership of the development lifecycle. Seeking to leverage my expertise in delivering reliable, end-to-end solutions for dynamic, multi-project environments in 2026.			
Experience	AW Advantage Software Engineer Officer December 2025 - Present Pantai Lembeng, Gianyar, Bali Experienced Software Engineer with a strong background in architecting high-impact digital services. I led the end-to-end development of public service platforms using modern RESTful API design and Vue.js. My work resulted in a 40% increase in processing efficiency and significantly improved user engagement. I thrive in bridging the gap between complex backend logic and user-friendly frontend experiences. Sahabat Laut Lestari (SLL) Software Developer Officer October 2025 - November 2025 Denpasar With 7+ years of experience in Software Engineering, I specialize in building robust backend systems and data traceability solutions. At Sahabat Laut Lestari, I led the development of a complex Supply Chain Traceability System (Fish-Tracing) using C# and Laravel. I successfully optimized database transaction speeds by over 40%, transforming manual processes into a high-speed digital workflow. I am committed to delivering clean, maintainable code and collaborating with cross-functional teams to translate NGO requirements into enterprise-grade production software. Dinas Komunikasi dan Informatika Kabupaten Badung Web Application Developer March 2025 - September 2025 Badung, Bali, Indonesia https://badungkab.go.id/ With six years’ experience as a Software Engineer and formerly serving as a Web Developer at Diskominfo Badung, I have architected, developed and maintained web applications and government-digital services aligned with public-sector demands. My expertise spans Laravel, Vue.js, DevOps pipelines and clean architecture, driving projects from conception through production while ensuring maintainability and scalability. Villa Bugis IT Officer February 2025 - February 2025 Kuta, Bali, Indonesia https://villabugis.com/ IT Officer at Villa Bugis, an established Seminyak villa management group with 15+ years in the Bali hospitality market and a 50–200 person operational team. Acted as a central technical point of contact across departments, supporting booking, operations, and guest-facing service teams, by keeping workstations, shared tools (e.g. Google Drive / Docs), and internal systems reliable. PT. Unicare Indonesia Gumilang Senior Software Engineer August 2019 - January 2025 Denpasar, Bali, Indonesia https://unicare-clinic.com/ Senior Software Engineer at PT. Unicare Indonesia Gumilang (Unicare Clinic), a Bali-based medical network providing 24/7 doctor-on-call, general practice, vaccinations, dental, urgent care, ambulance dispatch, and wellness programs. Delivered production-grade web applications and internal tools using modern PHP/Laravel stack and front-end technologies to support daily clinic operations, data integrity, and reporting. Took ownership of feature delivery from requirements gathering through deployment.
